

TOWN OF WATSON LAKE

A STATEMENT OF POLICY FOR ESTABLISHING THE TERMS AND CONDITIONS
UNDER WHICH THE TOWN WILL UNDERTAKE SNOW REMOVAL WITHIN THE
MUNICIPAL BOUNDARIES

Council acknowledged that a policy for snow removal should be established and as such adopt the following:

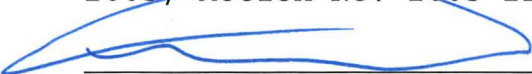

1) Driveways

- A. During snow removal from public roadways the Town will attempt to use the "driveway trap" on the grader to clear the windrows of snow at the edge of the travelled portion of the road and driveway or road approach to a property. If the plow truck removes snow from public roadways, the windrows of snow cannot be "trapped" and therefore the removal of the windrow will be the responsibility of the property owner.
- B. The location and snow depth in the driveways affect the use of the "driveway trap" and therefore the success of each "trapping" is dependent on circumstances.
- C. Snow removal between the travelled portion of the road and property line, together with the driveway and any other entrances is the responsibility of the property owner.

2) Hydrants

- A. Snow removed from between the travelled portion of the road and the property line, together with any snow from private property may not be piled within 15' of any fire hydrant.

The above policy was approved by Council this 6th of December, 2005, Motion No. 2005-22-295.
